PROFESSIONAL SUMMARY

Computer Engineering student specializing in Full Stack Development with React.js, TypeScript, Node.js, and Express.js. Experienced in developing web applications, integrating REST APIs, and designing database-driven solutions.

EDUCATION

Charotar University of Science and Technology (CHARUSAT) 2023 – 2027
B.Tech Computer Engineering CGPA: 8.62

Class XII (HSC) 71.38%

Class X (SSC) 93.16%

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, C, C++
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MySQL, MongoDB, Mongoose
- **Tools:** Git, GitHub, VS Code, Postman, MySQL Workbench
- **Core Concepts:** DSA, OOP, DBMS, Authentication, API Integration, System Design

EXPERIENCE

AMCODR May 2024 – July 2024
React Developer Intern

- Developed reusable React components for consistent UI architecture and maintainable code.
- Integrated REST APIs and implemented dynamic data rendering for interactive interfaces.
- Worked closely with senior developers using Git/GitHub for version control, managing branching strategies and pull requests.
- Debugged frontend issues, optimized existing modules, and collaborated on feature development and code reviews.

PROJECTS

InsightFlow – AI-Powered Document Intelligence Platform January 2026 – April 2026
React.js, TypeScript, Node.js, Express.js, MongoDB, AI APIs

- Building an AI platform for document uploads, contextual search, and natural-language question answering.
- Designing document processing with text extraction, embeddings, and semantic search.
- Integrating **Retrieval-Augmented Generation (RAG)** for context-aware answers with source references.
- Structuring retrieval workflows to connect relevant document passages with traceable AI-generated responses.

DevPulse – Real-Time Engineering Collaboration Platform May 2025 – August 2025
React.js, TypeScript, Node.js, Express.js, MongoDB, Socket.IO

- Building a collaboration platform for project management, issue tracking, and sprint planning.
- Implementing **real-time communication** and notifications using Socket.IO.
- Integrating GitHub APIs, role-based access, and project activity tracking.
- Designing event-driven updates to synchronize task, issue, and sprint changes across workspaces.

APIForge – API Monitoring & Observability Platform January 2025 – April 2025
React.js, TypeScript, Node.js, Express.js, MongoDB, Redis, BullMQ

- Building a platform to monitor API availability, response times, and endpoint reliability.
- Implementing scheduled health checks and background jobs using **Redis and BullMQ**.
- Developing failure alerts, request logs, and performance analytics dashboards.
- Analyzing endpoint response trends to identify recurring latency spikes and service degradation.

ACHIEVEMENTS

- Solved **300+ DSA problems** across LeetCode, CodeChef, and Codeforces.
- University Central Student Council (ULSC) Member at CHARUSAT.
- Served as SPOC for CognizanceX'26; received a Letter of Appreciation for leadership and event coordination.

CODING PROFILES

LeetCode – 300+ Problems Solved | **CodeChef** – Rank 89480 | **Codeforces** – Rating 625
